MUHAMMAD WALEED

Data Science | Machine Learning | AI & LLM Applications

Abbottabad, Pakistan | +92 316 8923321 | waleed.myc@gmail.com

linkedin.com/in/muhammad-waleed-myc | github.com/winx007

PROFESSIONAL SUMMARY

Data Science undergraduate with hands-on experience delivering end-to-end machine learning and NLP projects in a project-based internship. Built a multi-task CNN for age and gender estimation (**93.54% gender accuracy, 5.17-year MAE**) and a knowledge-graph pipeline for multi-hop question answering with Hugging Face transformers. Owns the full workflow — data cleaning, feature engineering, model training, evaluation, and interactive demos — using Python, SQL, PyTorch, TensorFlow, and scikit-learn. Seeking an entry-level Machine Learning / AI Engineer role focused on deep learning, LLM applications, and automation.

EDUCATION

BS Data Science CGPA 3.5 / 4.0

Pak-Austria Fachhochschule Institute of Applied Sciences and Technology (PAF-IAST), Haripur, Pakistan

Relevant coursework: Introduction to Data Science, Artificial Intelligence, Data Structures & Algorithms, Programming in C++, Python

Intermediate (HSSC), A Grade | Matriculation (SSC), A Grade | DIT short courses

EXPERIENCE

Data Science Intern — Project-Based Program Jul 2026 – Aug 2026

- Delivered end-to-end data science projects across computer vision, NLP, and business intelligence, owning data preparation, model training, evaluation, and user-facing demos.
- Automated sales reporting with Power BI and Excel/VBA dashboards, consolidating revenue, units sold, transaction, and target-attainment KPIs into interactive views.
- Built a counselor-support tool that predicts student wellbeing risk from engineered stress, engagement, and academic indices, benchmarking three classifiers and selecting the best by ROC-AUC (**0.973; 5-fold CV 0.988**).

SELECTED PROJECTS

Age & Gender Estimation — Multi-Task CNN | *PyTorch, MobileNetV2, UTKFace, Streamlit* GitHub

- Trained a two-head MobileNetV2 CNN on UTKFace for joint age regression and gender classification, reaching **93.54% gender accuracy, 0.933 F1, and 5.17-year MAE**.
- Added ethnicity-wise fairness evaluation (88.7–94.6% accuracy across groups) and shipped a Streamlit app supporting image upload and live webcam inference.

Knowledge Graph Construction & Multi-Hop QA | *Hugging Face Transformers, NetworkX, Python* GitHub

- Extracted entity-relation triplets from unstructured text with the REBEL transformer, built a directed knowledge graph in NetworkX, and answered 1-hop and 2-hop questions through graph traversal.
- Packaged the pipeline behind a CLI with demo and training modes, including automatic graph visualization.

Student Wellbeing Risk Predictor | *scikit-learn, pandas, Tkinter* GitHub

- Engineered four composite wellbeing indices from 500 student records and benchmarked Random Forest, Logistic Regression, and Gradient Boosting with stratified 5-fold cross-validation.
- Selected Logistic Regression on ROC-AUC (0.973 test; 0.988 CV) and delivered a Tkinter GUI that gives counselors an instant risk assessment.

Mobile Sales Analytics Dashboard | *Power BI, Excel* GitHub

- Built an interactive Power BI report tracking total sales, units sold, average price, and transactions across brands, cities, payment methods, and customer segments.

TECHNICAL SKILLS

Languages: Python, SQL, C++

ML / DL: scikit-learn, TensorFlow, Keras, PyTorch, XGBoost, feature engineering, model evaluation, cross-validation

NLP / LLM: Hugging Face Transformers, LangChain, LangGraph, NLP pipelines, knowledge graphs

Data / BI: pandas, NumPy, Excel, Power BI, Tableau, Plotly, Matplotlib, Streamlit

Concepts: exploratory data analysis, statistical analysis, data pipelines, model deployment, AI automation

Tools & Deployment: Git, GitHub, Docker, FastAPI, Jupyter Notebook, VS Code

ADDITIONAL

Languages: English (professional working proficiency), Urdu (native)

Availability: Open to remote roles in Pakistan and remote international opportunities.
